

## **TESTIMONIALS**

### **My wife went from one doctor to another and no one really seemed to be able to diagnose**

Thank you and your team for your help in the past years.

My wife had health problems for about two years. She went from one doctor to another and no one really seemed to be able to diagnose. The laboratory tests showed abnormalities and doctors were not able to suggest a treatment other than antibiotic as they could not define her problems.

My wife eventually received Floyd Brown's contact. An appointment was scheduled, and I went with her to Red Deer. Floyd did her blood analysis and could immediately pinpoint her main issue: candida. Additionally, there was black mould in her system as well as parasites. Floyd suggested a treatment through controlled nutrition and holistic products. The positive result after approximately 3 months was noticeable and improved even further.

Back then I took the blood analysis as well, even though I felt healthy and energetic, but I was curious, what he could see. Floyd's assessment just confirmed that. However, he found black mould and parasites, which my body was eventually strong enough to deal with it. I followed Floyd's suggestions and cleaned my system. As we paid already a lot of attention to our nutrition, I am impressed with Floyd's knowledge. He definitely gave us some good advice in how to improve and fine tune on our day to day food intake. Thank you, Floyd and his team!
